Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

PRIMARY EXAMINER

Art Unit: 1774

1. Claims 41 and 42 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims depend on withdrawn claim 2.

2

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3

Claims 30-33,39,40,43-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over De Zen(US 6189269 B1) in view of Markush(US 4097422).

The primary reference teaches the basic claimed invention including an elongated construction element of thermoplastic synthetic material with reinforcing elements therein- col 2, lines 40-49; col 8, lines 50-56; col 7, lines 22-52; col 9, lines 53-63. the primary reference fails to teach wood particles in its thermoplastic synthetic material. The secondary reference to Markush, however, teaches that it is known in the art to include wood particles in thermoplastic material such as taught by the primary

reference- col 13, lines 53-60; col 22, lines 49-61; col 25, lines 63-37. it would have been obvious to one of ordinary skill in the art at the time the invention is made to combine the teachings of the secondary reference and facilitate the primary reference with such wood particles, to impart desired characteristic to the patented element of the primary reference, in the absence of unexpected results. , Concerning claims 49 and 50, the secondary reference teaches glass fibers- col 22, lines 14-16. see primary reference, col 2, lines 40-45; col 7, line 35. concerning claims 31-33, 44, the secondary reference teaches the claimed wood [particle amounts in col 13, lines 54-56. concerning claims 39 , 43-48 and 40, the primary reference teaches similar claimed profile in figs 3 and 4. see entire reference.

4

Claims 34-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over De Zen('269) and Markush('422) as applied to claims 30-33, 39, 40, 43-50 above, and further in view of West et al(US 3856891).

The West et al patent teaches that it is known in the art to utilize elongated construction element of similarly claimed modulus as required by claims 34-36- see claims 1, 2. . Concerning claims 37 and 38, the '891 reference teaches its product "nailable" - col 2, lines 30-35.
